

Practical Quality Improvement Course (PQIC)

March 13 - September 18, 2026 | Online Course

Virtual sessions will be conducted on alternate Fridays

Introduction to ANZICS PQIC

The ANZICS Practical Quality Improvement Course (PQIC) is a specialised online program for ICU healthcare professionals. It provides essential knowledge, hands-on skills, and proven tools to lead quality improvement projects that enhance patient care and drive sustainable change in intensive care settings.

Course Overview

This 13-module course for intensive care clinicians uses a blended learning model combining theory with practical application of quality improvement (QI) methods. Participants work in small multidisciplinary teams to complete a critical care QI project using ANZICS CORE data. Learning is supported by instructional modules and faculty mentorship to guide both knowledge development and project delivery.

Learning Environment

- **Google Classroom** – Access to all course materials and assignments
- **Zoom** – Live lectures, workshops, and Q&A sessions
- **Pumble** – Discussion forum for collaboration and peer support

Registration Pricing (inc. GST)
